DO NOT UPLOAD THIS PROJECT TO MANGA AGGREGATE SITES SUCH AS MANGAGO, MANGAHERE, MANGAFOX, ETC ETC..
MY PROJECTS ARE NOT FOR PROFITS.

Let's spend a week to study zombie games, trends, general concepts and ideas
Yes ~
Gathering data on zombie
Play zombie related games
Purchasing zombie sneakers
Work !!
Now let's share what you have in your mind.
I've thought about a game where a group of zombies take over an IT company and try to establish zombeie network
This zombie IT company will attempt to invest in stock markets as well as ...
Boring as hell ...
?!!!
It's a good idea!

How about educational zombeie game ?
Depending on where you shot a zombie...
A pop up window will show up and explain functions of the organ
Skull smashing You can't advertise or sound brutal in this part !
If not, how about Zombie Runner ?
It's a zombie race game where zombies will need to obtain blood to keep running
I am actually very good at drawing blood effect..

My idea.. is about a game titled "Male only middle, high school, and then engineering to military service". I am hoping the title is unique enough to attract enough users
The game concept is that those who want through such a path will turn into zombie and spread virus..
Mr Bear, I suppose you want through that route ?
Ah.. yes
GAWD !
My, my
And now here..
...
And now you are a zombie.. No girl for you
I've named my game "Zombie dungeon" where zombies will construct underground dungeons.
At its core, it is basically time-killing dungeon building game.
Along with some collectibles that users may unlock or even purchase
Ooh,You are the planner
Since we are going with my idea, I will draft a basic project plan soon.
Lol~
Reum and Mr. Bear, start out which game engine we are going to use.
Mashmell, be quick on graphic concepts
And chief
* Credit card
I will go get the company *CC
Party ~

* Male only middle & high school
No chance to meet girls of his age for entire teenage hood
* And there is chronic lack of females in engineering courses at college / uni
And of course, no female seen at military
Very few females in gaming industry to add
